

PRESSRELEASE SF MARINA

10 December 2021 | Göteborg, Sweden

SF marina has added a new office in Sao Paulo

SF Marina, the leading manufacturer of floating docks, breakwaters and concrete structures, has added an office in Sao Paulo, Brazil. Led by Ernani Paciornik, SF Marina Brazil functions as the official agent in the country and strengthens the parent company's global production and distribution network.

"While known for its beautiful beaches, Brazil sees its fair share of tropical cyclones," said Michael Sigvardsson, SF Marina CEO. "That's why our products are so ideal for the region. Built to withstand the most violent weather events, when the storm passes, they're still there."

SF Marina docks and breakwaters utilize robust reinforced floating concrete pontoons. Virtually unsinkable, they are engineered to withstand hurricane-force wind and wave action. Because of their modular nature, the components can be transported by barge, making an SF Marina system feasible practically anywhere on the planet with water access.

SF Marina Brazil operates under the Grupo Náutica umbrella of marine businesses. The 40-year-old firm is the largest nautical-oriented company in the country and has extensive development experience throughout the South American region. Its website is www.gruponautica.com.br.
